Professional Experience

Kornit Digital North America

Data Analytics Intern - Marketing Operations Team   May 2023 – Present | Englewood, NJ
- Create and implement new software and digital visuals through data extraction and consolidation to increase company outreach to the target markets.
- Generate heat maps and organize data for the sales, marketing, and leadership team to understand better target markets, and other critical pieces of information to increase outreach and better sales decisions.
- Leverage Excel and Tableau for data mining to enhance and analyze large data sets for senior-level teams.
- Increase and aid marketing tech stack, engine, budget, and overall company ecosystem.

Project Manager Intern   Dec 2021 – Aug 2022 | Engelwood, NJ
- Concurrently worked with the senior project manager to create, implement, and control projects valued at $250K-$1M+,
- Monitored single-product projects. Worked with Customer Success Managers to ensure projects met timely standards while having minimal setbacks. Obtained high client satisfaction consistently.
- Oversaw implementation engineers, and application testing engineers to ensure performance and quality were company standards for clients.
- Assessed and used problem-solving skills with the senior project manager to create consistent positive project outcomes through the installation of new project processes.

WorldWide Logistics Group, Intern   Feb 2021 – Dec 2021 | Paramus, NJ
- Finalized over 500 accounts monthly to ensure end-of-month numbers were adequately represented.
- Successfully used software such as NetSuite, CargoWise, and Aljex to aid and increase work productivity.
- Maintained and managed two company branch files and worked with customer invoices and bills.
- Effectively communicated and collaborated across departments to increase workflow.
